**Moshfique Uddin, Agyenim Boateng : Cross-Border Mergers and Acquisitions: UK Dimensions (Routledge Advances in Management and Business Studies)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Cross-Border Mergers and Acquisitions: UK Dimensions (Routledge Advances in Management and Business Studies):

Cross-border mergers and acquisitions (CBMAs) activity has become an important vehicle for firms' internationalization and corporate restructuring over the past three decades. Despite the huge volume of global CBMA activity, however, there are few books which carefully explore the strategies, motives, and consequences of global mergers and acquisitions. This book discusses and synthesizes the theoretical literature on the motivation and performance of international merger activities. Focusing on the UK as a top acquiring country in the European Union, the authors explore the recent trends in cross-border mergers and acquisitions, motives for cross-border mergers and acquisitions, the mergers integration process, home and host countries' macroeconomic consequences on mergers and acquisitions, and shareholders' wealth effects on CBMA. This book explores and sheds much-needed light on the UK CBMA market, what drives it, and what lessons can be learned for other regions around the globe.

About the Author Moshfique Uddin is a Senior Teaching Fellow in Accounting and Finance at Leeds University Business School, UK. Before joining at Leeds University Business School, he was Lecturer in accounting and finance at University of York and Leeds Metropolitan University, UK. He completed my Ph.D. in the area of cross-border mergers and acquisitions, has published in the area of mergers and acquisitions, and is currently doing research in the area of empirical finance.
