Use social media network to connect with people so you can advertise to them and linked them to your campaign from a site that satisfy the requirement of crowdfunding.2. Follow the SEC guidelines and get an attorney to make sure everything you do is okay3. Get funded4. Keep your investors updated regularly via forum or group5. Repeat if necessaryToo much of the general investing stuff that seems like a filler for the book. Most of the readers are well-knowledge about business so reading on business 101 is just wasting time.You literally can do a search online and find more useful info than this book.0 of 0 people found the following review helpful. Great introductory guide on the basics of crowdfundingBy M. WallaceWe purchased a few books on Crowdfunding and Kickstarter because as we considered launching a raise ourselves using crowdfunding."Crowdfunding Investing for Dummies" gives a good soup-to-nuts overview of what crowdfunding is and how to formulate a plan to raise funds for your idea, startup or business. It's the place to start for all levels of

entrepreneur interested in this kind of funding. This book provides interesting history on the origins of crowdfunding (I had no idea about Yunus, Grameen Bank and the Nobel Prize roots of crowdfunding) and gives good examples of successful ventures. I recommend this book for beginners wanting to know more about crowdfunding and for experienced entrepreneurs looking to round out their knowledge on the subject. 0 of 0 people found the following review helpful. not bad but much here seems obvious. By Mageditor This book was somewhat helpful but lot of what is in it is obvious. I was disappointed there wasn't more nuts and bolts about how to do this, where are the vendors or online financial firms that help with the process. But I haven't read past Chapter 20 and I guess things are changing so fast that more detail might not have been available when this was published

The easy way to get started in crowdfund investing Crowdfund investing (CFI) is going to be the next big thing on Wall Street. U.S. investment banks, brokerage houses, and law firms are gearing up for the creation and regulation of new financial products that will be available to the general public starting in early 2013. The introduction of these products will revolutionize the financing of small businesses and startups for these key reasons: Entrepreneurs and small business owners, who have had difficulty obtaining capital through traditional means (such as bank loans and angel investors) in recent years, will have access to investors around the world through social media. For the first time, investors (so-called unqualified investors) will be able to purchase an equity stake in a business or new investment vehicle. The Securities and Exchange Commission (SEC) is overseeing the creation of online portals that will allow entrepreneurs and small investors to connect. When these portals go live in 2013, Crowdfund Investing For Dummies will be on the front line to educate business owners, other entrepreneurs, and investors alike. Crowdfund Investing For Dummies will walk entrepreneurs and investors, like yourself, through this new investing experience, beginning with explaining how and why CFI developed and what the 2012 JOBS says about CFI. Entrepreneurs will find out how much funding they can realistically raise through CFI; how to plan and launch a CFI campaign; how to manage the crowd after a campaign is successful; and how to work within the SEC's regulations at every stage. Investors will discover: the benefits and risks of CFI; how much they can invest; how a CFI investment may fit into a broader investment portfolio; how to provide value to the business or project being funded; and how to bow out of an investment when the time is right. Crowdfund Investing For Dummies is an indispensable resource for long time investors and novice investors alike.
