David Simon : Fifty Key Thinkers on Development (Routledge Key Guides) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Fifty Key Thinkers on Development (Routledge Key Guides):

The essential guide to the world's most influential development thinkers, this authoritative text presents a unique guide to the lives and ideas of leading contributors to the contested terrain of development studies. Reflecting the diverse, interdisciplinary nature of the area, the book includes entries on: * modernisers like Hirshman, Kindleberger and Rostow * dependencistas such as Frank, Cardoso and Amin * progressives like Prebisch, Helleiner and Streeten * political leaders enunciating radical alternative visions of development, such as Mao, Nkrumah and Nyerere * progenitors of religiously or spiritually inspired development, such as Gandhi and Ariyaratne * development-

environment thinkers like Blaikie, Brookfield and Shiva. This is a fascinating and readable introduction to the major figures that have shaped the field, ideal for anyone studying or working in the area.

'Fifty Key Thinkers on Development is a stimulating and inspiring book... I readily recommend this book to anyone with an interest in development - whether academics, students, practitioners or politicians. There is something there for everyone and it deserves a wide and diverse readership.' - Singapore Journal of Tropical Geography 28(2), 2007

About the Author David Simon is Professor of Development Geography and Director of the Centre for Developing Areas Research at Royal Holloway, University of London. He is the co-editor of *The Peri-Urban Interface: Approaches to sustainable natural and human resource use* (Earthscan, 2005).
