Jakob de Haan, Sander Oosterloo, Dirk Schoenmaker : Financial Markets and Institutions: A European Perspective before purchasing it in order to gage whether or not it would be worth my time, and all praised Financial Markets and Institutions: A European Perspective:

Written for undergraduate and graduate students of finance, economics and business, the third edition of Financial Markets and Institutions provides a fresh analysis of the European financial system. Combining theory, data and policy, this successful textbook examines and explains financial markets, financial infrastructures, financial institutions and the challenges of financial supervision and competition policy. The third edition features greater

discussion of the financial and euro crises, including extensive analysis of their causes and impact, as well as their remedies. New material covers unconventional monetary policies, the Banking Union, the Basel 3 capital adequacy framework for banking supervision, macroprudential policies and state aid control applied to banks. The new edition also features wider international coverage, with greater emphasis on comparisons with countries outside the European Union. Visit the companion website at www.cambridge.org/de_Haan3e for password-protected PowerPoint lecture slides, solutions, figures and tables for instructors, and exercises for students.

"A quarter of a century ago, the European financial system consisted of segmented national markets and institutions. The process of creating a single unified system has made considerable progress but still has some way to go. This book provides an excellent account of why this process is important, the current situation, and how it will proceed in the future. It is very well suited for its target audience of advanced undergraduates and Masters students and will be useful to all those interested in the topic. I highly recommend it." Franklin Allen, Executive Director of the Brevan Howard Centre and Professor, Imperial College London

"Now that an integrated European banking and financial system has become established, there is a need for a book to describe and to analyse its working. The authors, who have great experience in the practical, regulatory and academic aspects of their subject, do this admirably, clearly and succinctly. This will be an invaluable textbook for all students of European banking and finance." Charles Goodhart, Professor Emeritus, London School of Economics and Political Science

About the Author Jakob de Haan is Head of Research of De Nederlandsche Bank and Professor of Political Economy at the University of Groningen. Sander Oosterloo is Deputy Head of Financial Stability at the Netherlands Ministry of Finance. Dirk Schoenmaker is Dean of the Duisenberg School of Finance, Amsterdam, and Professor of Finance, Banking, and Insurance at the VU University Amsterdam.
