Very helpful check list and reflection for any new on-boarding CEOBy Michel WeltersThis book from George and Gillian gives you a very good overview of the techniques and challenges facing a CEO in his new role. By Nicolas Leblanc  
Working for a large company in a new leadership role, the concepts and tools shared in this book apply and align with the leadership framework of my employer. This book provides real life examples of successful leaders and provides guidance for leaders in different leadership roles, whether you are leading a small team, or a large community. The BRAVE concepts are definitely applicable, and I enjoyed the focused content based on the size of your team. I really connected with the contents of the book, especially on the topics of vision and mission statements. The exercises allowed me to narrow down my employer's goals to apply specifically to my team. One hurdle I face as a new leader is to step away from being an individual performer or contributor, and be a leader to inspire my team of performers in my area of expertise. I don't stand alone in this space, and some helpful hints or tools to help overcome that hurdle is encouraged. This is where understanding the managing vs. leading comparison is key. Secondly, as I am doing here, an important element I have learnt in my journey is the value of feedback. I can only grow as a leader and make a difference if I know what I am doing well or what needs improvement. I think it's important to share ways of asking for constructive feedback and applying it to continue on a strong leadership path. I thoroughly enjoyed the book, its release timed perfectly with my promotion into a leadership role, and I will continually refer to it as I continue my journey. Thanks!

By Jesse Lahey  
Did you know that 40% of new leaders fail in the first 18 months? How can you avoid failing as a new leader, and learn from other leaders' mistakes rather than making so many of your own? If you are a new leader or would simply like to take their leadership to the next level, I whole-heartedly recommend George Bradt's latest book. First-Time Leader begins with a discussion of taking charge of your new team and then tracks through BRAVE leadership components from the outside in: - Environment: setting the context for everything else by understanding where you are playing. - Values: the bedrock of a high performing team. Get clear on what really matters and why. - Attitude: encompassing strategic, posture, and culture choices around how to win. - Relationships: the heart of leadership. If you can't connect, you can't lead. - Behaviors: the actions that make real lasting impact on others. The #1 problem first-time leaders face is failing to understand that leading requires entirely different strengths than does DOING or MANAGING. This book will help you develop the strengths that will make you successful as a leader. Great leaders go one step further to co-create a purpose-driven future with their followers. This book will teach you how to do that. Many people mistakenly assume that you need charisma to be an effective leader, and you either have it or you don't. This book will help you succeed as a leader regardless of your level of charisma. George was once a new leader himself, rising through leadership and executive roles at Procter Gamble, Coa-Cola, and J.D. Powers. In addition, he has helped many executives succeed in new leadership roles. He speaks from experience. Furthermore, he speaks from the heart. He is not a self-focused "guru" full of empty promises. I had the privilege of interviewing George, and I found him to be authentic, humble, and generous. I don't think you can go wrong by following advice from George Bradt.
