Micheal C. Leary : From Defense to Development?: International Perspectives on Realizing the Peace Dividend (Routledge Studies in Defence and Peace Economics) before purchasing it in order to gage whether or not it would be worth my time, and all praised From Defense to Development?: International Perspectives on Realizing the Peace Dividend (Routledge Studies in Defence and Peace Economics):

This impressive book tracks the progress of twelve countries on five continents in moving resources from defense to

civilian activity in the 1990's. Based on intensive field research, thanks to its truly international array of contributors, the book addresses each country with an impressive standard of scholarship. This accessible book is written in non-technical language and will be of great use and interest to academics involved with defense economics, defense studies and development studies. It will also prove popular with international development organizations, the defense industry and policy-makers around the world.
