**The World Bank : Global Economic Prospects, June 2015: The Global Economy in Transition** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Global Economic Prospects, June 2015: The Global Economy in Transition:

Global growth is expected to be 2.8 percent in 2015, but is expected to pick up to 3.2 percent in 2016-17. Growth in developing countries and some high-income countries is set to disappoint again this year. The prospect of rising

borrowing costs will compound the challenges many developing countries are facing as they adapt to an era of low commodity prices. Risks to this outlook remain tilted to the downside. This edition of Global Economic Prospects includes two Special Features that analyze the policy challenges raised by the two transitions in developing countries: the risks associated with the first U.S. central bank interest rate increase since 2006 and the implications of persistently low commodity prices for low-income countries. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on developing countries, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced by developing countries while the June edition contains shorter analytical pieces.

About the Author The World Bank Group has set two goals for the world to achieve by 2030: End extreme poverty by decreasing the percentage of people living on less than \$1.25 a day to no more than 3% Promote shared prosperity by fostering the income growth of the bottom 40% for every country
