Technology permeates nearly every aspect of our daily lives. Cars enable us to travel long distances, mobile phones

help us to communicate, and medical devices make it possible to detect and cure diseases. But these aids to existence are not simply neutral instruments: they give shape to what we do and how we experience the world. And because technology plays such an active role in shaping our daily actions and decisions, it is crucial, Peter-Paul Verbeek argues, that we consider the moral dimension of technology.

Idquo;Verbeekrsquo;s commendable book charts a middle ground between technophobia and techno-utopianism, and he makes a strong case for the need to view our technologies as active agents rather than neutral tools in our lives.rdquo;
